

## Art & Design: What did the 'Golden Age' give us?

### What should I already know?

In Year 4, we learnt about various artists such as L.S Lowry who is known for his drawing and painting on cotton mills during the industrial revolution, Andokides is a Greek artist known for vase painting and introducing red figure style and Michael Phelan an American painter who used concentric circles to make his painting giving the effect of tie and dye technique. We have learned skills linked to sketching, and fabric painting so far.

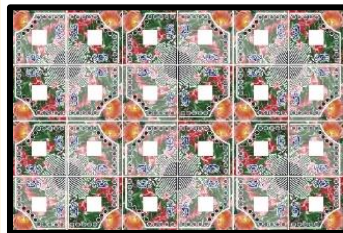

tessellation	rotational	symmetrical	asymmetrical	symbolic	pattern	angular
an arrangement of shapes closely fitted together, especially of polygons in a repeated pattern without gaps or overlapping. 	Using a circular movement about an axis or centre 	made up of exactly similar parts facing each other 	Made up of parts which do not have symmetry 	serving as a symbol about something 	a repeating unit of shape or form 	having angles or sharp corners 

Guided by the Qur'an and Islamic tradition, Siddiqa Juma creates art that celebrates a rich religious and cultural heritage.

Siddiqa is best known for her paintings

It is not just the content and subject matter of Siddiqa's work that reveals her beliefs: the processes by which her work is created have as much to tell. Siddiqa's pieces are characterised by successive layers of vivid colour and intricate repetitive patterns and calligraphy, which draw to mind the ancient illuminated Qur'ans now proudly housed in museums around the world.

Siddiqa centres her paintings around Hajj, which is one of the Five Pillars of Islam

Mix and match colours to create atmosphere and light effects.

Use flat and round brushes to apply paint on the clay tiles to get the desired tones

Use symmetrical shapes to make an Islamic pattern

Create geometric patterns using different shapes and tessellation skills.

Make clay tiles using clay tools and creating design using the tools.
