

Geography: Could you survive without Technology??

What should I already know?

In KS1, I have identified seasonal weather patterns in the UK and made comparisons between each season. I compared physical and human geography of Bolton and Jamaica. I devised a map of the school grounds and used symbols in a key and used directional language to follow directions. I am confident with locating hot and cold areas of the world and understand how the countries near the equator are usually warm. I have also explored the North and South pole. I know the country I live in is called England. England is a country in the United Kingdom (England, Scotland, Wales, Scotland and Northern Ireland). Great Britain is an island - It is surrounded by the seas: Irish Sea, North Sea and English Channel. There are seven continents and five oceans.

Map	A drawing of a particular area such as a city, a country, or a continent, showing its main features as they would appear if you looked at them from above.
Satellite Navigation	A system that provides location and time. It relies on the use of a receiver calculating its position with signals sent by at least four satellites.
Location	A particular place or position.
Tourism	Travel for pleasure or business.
Crops	A plant or animal product that can be grown and harvested.
Landmarks	An object or feature of a landscape or town that is easily seen and recognized from a distance.
Land	The part of the earth's surface that is not covered by water.
Travel	Go from one place to another, typically over a distance of some length.
