

# Geography: Who has helped us travel from past to present?

## What should I already know?

In EYFS I looked at different ways of moving in a space successfully, anticlockwise as a direction, comparing similarities and differences of people and places and 2D shapes. I also learned about the features of my immediate environment and how environments might vary from one another.

Map	A drawing of an area which helps us plan routes. Maps show features such as rivers, lakes, forests, buildings and roads.
Key	Maps use symbols or colours to represent things. The key is a section on the map which explains what these symbols/colours mean.
House	The building where somebody lives.
Farm	An area of land where plants and animals are grown or reared on a large scale, for people to eat.
Shop	A building where products are sold. People can buy things from a shop. There are different types of shops: food, clothes, pet supplies etc.
Compass directions – North, East, South & West	A compass is a tool used to show direction. A compass has 4 direction points: North, East, South, West. We live in the North of England. London is in the South of England.
Transport	A way of moving people and goods from one place to another. There are many different forms of transport such as: car, bicycle, bus, train, tram, aeroplane, helicopter, boat.

## Weather

Autumn - the temperature drops after summer. The weather is often windy and stormy  
Summer – the weather is generally warmer than any other season and there is less rainfall.
