

Design Technology: How did the Tudors shape our lives today?

What should I already know?

In Year 1, we have learnt textiles, food and mechanism. For textiles we used large needles to create running stitches. We cut out an outline and used a range of joining tools such as fabric glue, tape and sewing. In food, we measured liquids and dry ingredients. We also learned how to use a knife safely. For mechanisms, we practiced measuring in centimetres, marking out, cutting using scissors and joining materials using tape, masking tape and blue-tac before making our toy car. In Year 2, so far we have built on our knowledge of food. We used skills such as beating and folding to make dough and kneaded dough. Children also selected appropriate equipment such as a peeler, grater and butter knife to support them with what they were making.

Purse/money bag	Joining	Evaluate	Template	Finishing	Material	Sewing
A small bag or pouch used to hold or carry money to keep it safe.	Become linked or connected to something else.	Think of an idea then assess it how well it has been made/worked.	A shaped piece of material used to help cut out or shape.	Hand stitching done on the edge to stop the edges of the fabric from fraying.	What things can be made from i.e. silk, felt, cotton etc.	To join or fasten something by making stitches with a needle and thread.
						

The Tudor rose is red around the outside and white in the centre. The rose represents the merging of two warring houses (Houses of York and Lancaster), and the end of years of conflict. The rose is a symbol of peace and unity.

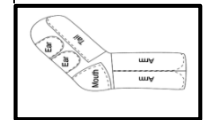

Cut out shapes created by drawing round a template onto fabric.

I can explore ideas by rearranging materials.

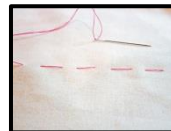

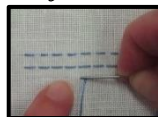

I can use my drawings to record and develop ideas.

Sewing techniques

I can confidently join materials using a running and basting stitch.

I can select and use specific textiles tools such as large needles, thread, fabric glue, material.
